Weight	~900 pounds/408 kilograms
1906 Cost	Priceless! (USD)

## An Unbelievable Prototype!

This automobile was a successful effort by Ford Motor Company to introduce a six-cylinder engine into a lightweight car. Detroit newspapers reported that Henry Ford drove this car around town showing off its incredible horsepower. Now fully restored, the car has been on a worldwide journey. It was purchased from the archives of The Henry Ford Museum in the late 1980s, sold to an owner in Australia and then purchased by the current owner in Ontario, Canada.

## Innovations

Six cylinders in a Model N chassis that was designed to be a four-cylinder automobile!

## Hugo and Linda Vermeulen

Special thanks to Hugo and Linda Vermeulen for their generous loan of the car to Piquette!
