Body	Depot Hack
Horsepower	20
Weight	1,205 pounds/549 kilograms (chassis only)
1921 Cost	\$360 (USD chassis only - no modifications)
Price Change	\$165 less than 1920 (chassis only)

Innovations

The original “taxi cab”

Very creative engineering to produce a four-wheel drive T

Four-Wheel Drive Model T!

Jesse F. Livingood (1894-1961) of New Virginia, Iowa, was a very creative inventor and innovator. He first converted a Model T to 4-wheel drive in 1914. He drove this car extensively until 1941, proving unquestionably its value in snow and mud. Mr. Livingood produced all of the specialized components needed for the assembly of this unusual vehicle. In more recent years, his son, Jesse R. Livingood, has recreated about (26) 4-wheel drive Model T's, using his father's original patterns and drawings. This amazing vehicle typifies the hundreds of innovative conversions that allowed the readily available and inexpensive Model T to perform tasks it's creators at the Piquette Plant never imagined!

Randy Shelton

On loan from Randy Shelton of Detroit, Michigan. Randy has many vehicles on loan at Piquette. He is also a very active member of the Piquette T's – a Model T club hosted at this museum.
